Experience

Software Engineer Intern, IBM Turbonomic Mar 2026 – Sep 2026

- Developed production software for the application infrastructure team of IBM Turbonomic, an application resource management platform.
- Designed and implemented GPU usage monitoring functionality to allow automated resource scaling on monitored GPU environments.
- Built and integrated backend and frontend components using Java, Python, TypeScript, React, and Kubernetes.

Lead Software Engineer, UCD Formula Student Feb 2026 – Present

- Lead a software engineering team developing embedded software and communications systems for a Formula Student racecar.
- Designed and built a communications network architecture using multiple modular microcontrollers.
- Implemented vehicle firmware, and telemetry logging software using C++.

Education

BSc Computer Science, University College Dublin Sep 2023 – May 2027 (Expected)
Current GPA: 4.12 / 4.2

Leaving Cert, CBC Monkstown Sep 2020 – Jul 2023
Leaving Cert points: 625

Skills

Languages: C, C++, Python, Java, TypeScript, SQL

Technologies: Kubernetes, Docker, React, Git

Concepts: Object-Oriented Programming, Databases, Data Structures & Algorithms, Computer Networking, Cybersecurity, Digital Systems

Projects

HexOust Board Game (Java)

Strategic turn-based board game made with JavaFX GUI tools and event-driven programming.

Project Management Software (C)

Text-based project management tool with Gantt chart generator, built using C.

Algorithm Energy Consumption Analysis (Java)

Research experiment analyzing how the energy consumption of different sorting algorithms scales with larger datasets.

Employment History

Sales Assistant, Dunnes Stores Sep 2023 – June 2025
Gained experience working as part of a large team of 100+ staff in a fast-paced work environment.

Sales Assistant, Sports Direct Aug 2022 – May 2023
Developed excellent interpersonal and teamwork skills while assisting 50+ customers daily.

Hobbies

Coding — Poker — Music Production — Rugby — Martial Arts — Chess
